

# Dutton Island Preserve Itinerary

Address: 622 Dutton Island Rd W, Jacksonville, FL 32233

- When you arrive, follow the rustic road and pick a spot to start your adventure or follow it down to the fishing dock where you will find a parking area. You can launch here for kayak fishing or bird watching. You will see osprey, bald eagles, herons, wood storks, and other resident and migratory birds. You may also encounter dolphins and manatees. For the fisherman, it is reported that off the pier you have high chances of catching red drum, sand sea trout, black drum, sheepshead, spotted sea trout, and flounder. Have a nice picnic in one of the picnic areas.
- Enjoy a hike through the 3 miles of trails. Along the trails you can view unspoiled salt marsh, pine flat woods, scrub and live oak hammocks.
- Dutton Island campsites are primitive camping with fire rings on site. There are 5 campsites available by permit only.
- Paddleboard off the kayak dock, while the currents are very strong in the Intracoastal, there is an area adjacent to the dock where it is calm and allows for a relaxing paddle.
